The scatter plot displays LBDTC values over time. The x-axis, labeled 'LBDTC', shows dates from 2001-01-01 to 2001-02-15. The y-axis, also labeled 'LBDTC', ranges from 0 to 100. The data points are red dots. The values start around 20 in early January, rise to about 40 by mid-January, and then fluctuate between 40 and 60 until late February, where they reach approximately 70. There is a notable outlier near 100 around January 10th.
